Electro Polishing 99 Ltrs.

Doit Industries Electro Polishing Machine is equipped with an electro chemical process that removes metal from articles. It improves the surface finish via reducing the surface roughness by levelling micro-peaks and valleys. Due to its ease of operation and its usefulness in polishing of irregularly-shaped objects now Doit Industries ELECTRO POLISHING has become a common process in the World of production of Jewellery

Features :

- ▶ All the intricate portion of the articles are finely polished by this process.
- ▶ Easy and simple to operate and process.
- ▶ The removal of the metal is slow so low current density area is covered very well.
- ▶ Removed metal is dissolved in liquid which is 95% to 98% recoverable from liquid by refining process.
- ▶ The process cost is very low which is very mandatory to cut down the production cost.
- ▶ Gold, silver and brass jewellery can be polished in the same machine at different times with different chemicals and parameters.
