

## MAGNETIC STIRRER

Magnetic stirrer is ideal for removing support wax and delivering clean part wax pieces from the output of Wax 3D Printers. It has a fine-tuned PID Controller to maintain the temperature at the point set by the operator, delivering precise temperature control. Magnetic Stirrer's outer body is made of stainless steel, making it suitable even for use with highly corrosive chemicals and cleaning agents. It has a precise speed controller that maintains a stable motor RPM.

## FEATURES

- Rotation can be controlled.
- Any size of beaker is usable (1ltr to 8ltr max).
- MLH model has heating facility.
- Better speed regulation even with small volume and low speeds.
- Digital speed indicator for display of stirring speed.
- Along with stirring heating can be also be effectively applied.
- Heating sensor is also available for maintaining temperature.
- Accurate stepless speed control maintains excellent speed stability.
- Totally enclosed unit, Designed for use even in corrosive atmosphere.

CODE	MAGNETIC STIRRER
Dimensions	280 x 345 x 210mm
Mix Speed	5000rpm
Temp Max	50 °c
