

Wet Jet Machine

WET-JET Blasting with Water and Glass Beads

Manufactured by :

The Wet Jet (Hydro- Sandblaster) is designed to create special fine surfaces on jewellery. Dress up simple castings, stone-set rings, brooches and pendants, even better than conventional sand blasters. It is also very proper for platinum jewellery. The water and the blasting medium meet in the nozzle of the handpiece and is arriving through adjustable compressed air flow on the surface of the working parts. Micro-fine glass beads, blasted with water, gives the jewellery a fine satin-frosted finish. By the micro-fine surface the risk of fingerprints is extensively reduced. It gives satin finish.

Features :

- ▶ Heated tank for blasting media.
- ▶ Foot operated switch.
- ▶ Easy filling of blasting media by mounted funnel.
- ▶ Sturdy handpiece with exchangeable nozzle on request.
- ▶ Water pressure tank with pressure regulator.
- ▶ Cabinet for operation with internal light source and safety hand gloves.

| Specification | Wet Jet Machine |
|--------------------------------|-----------------------|
| I/p Voltage | 230 V, 50/60 Hz |
| Dimen. of tank for glass beads | Dia. 3" x height 5.2" |
| Dimen. of machine | 12" x 10.4" x 15" |
| Heater | 150 watts x 1 |
| Pressure | 4 bar |
