

Hand Wash Stand

Water Treatment & Recovery

Manufactured by :

**Hand Wash Stand
with 2 taps - 1 MT**

The Doit Industries Hand Wash Stand consists of a submersible pump, Filtering units using the thread type filter cartridges and multiple settling tanks inside the Wash Stand itself. These Internal settling tanks allows the gold smith sector Operators to monitor the residue of precious metal from the drain water of various stages of Jewellery Manufacture process. A Bigger percentage of the remnants of precious metal from the discharge will get collected in the settling tanks and even the smallest percentage of minor sized pieces gets collected in the filter cartridges . Thus a great amount of precious metal loss is saved here.

Technical Features :

- ▶ Made of Polypropylene
- ▶ Complete with Pump & Filter Cartridge
- ▶ Internal Cascade System does not disperse residues of precious metal
- ▶ Foot Pedal Operated Tap
- ▶ Automatic operated pump and pressure gauge
