

# Glass Beads

Glass beads Per Kg - Glass beads are versatile spherical particles made from soda-lime or borosilicate glass. They are used for surface finishing, reflective road markings, jewelry and crafts, and as fillers in materials. Safety and proper disposal are important, and they must meet specific standards for certain applications, like road markings, to ensure safety and quality.

## Features

- ▶ **Surface Finishing:** Glass beads are commonly used in abrasive blasting operations to remove paint, rust, and surface contaminants from metal, plastic, and other materials. This process is known as bead blasting or abrasive cleaning.
- ▶ **Reflective and Decorative:** Glass beads are often added to paint, road markings, and signs to enhance visibility in low-light conditions.
- ▶ **Jewelry and Crafts:** Glass beads are popular materials in jewelry-making and craft projects, as they come in a wide range of colors and shapes.
- ▶ **Filler and Filler Material:** Glass beads are used as fillers in various applications, including plastics, composites, and adhesives.
