

Colorit Premium Bond

25 ML

Marketed by : 

The modern material COLORIT gives the designer countless opportunities to produce distinctive, colorful creations. Color is moving, inspiring, and fascinating. COLORIT allows this feeling to be translated in to elegant pieces of jewellery – with impressive effects. The design possibilities are virtually limitless with COLORIT. The color-fast tones are available in a number of nuances and can also be freely mixed. Since it is easy to work with, your imagination and love of experimentation will know no limits. The composite material with ceramic reinforcement can be applied quickly and easily, hardened permanently under blue light and ground and polished mechanically. The material is adhesion-, shock- and wear-resistant, making it ideal for high-quality and individual designs.

Medical and dental instruments, drills and tools can be safely and reliably labeled with the biocompatible, patented COLORIT and COLORIT Dual marking systems. Both systems – based on a composite material with ceramic reinforcement – are available in standard colors or customized nuances. Samples using customers' instruments can be produced in our technical laboratory on request. Simple application, mechanical workability and color consistency and resistance guarantee flexible, reliable and long-lasting color marking – for the distinctive labeling of medico-technical instruments.

Colorit Premium Bond

This Premium Bond Protective Layer is a required primer that is used at the initial stage of applying COLORIT® colour resins to your pieces. It is particularly useful on larger inlays, highly polished surfaces and jewellery that will be electroplated after COLORIT® resins have been added.

Features

- ▶ Required primer for use with COLORIT®
- ▶ Creates a chemical bond between resin and metal
- ▶ Helps to secure colour resin in place
- ▶ 1st stage of a 4 stage process
