

# Graphite Crucible

1 & 2 Kg

High-quality graphite container designed for efficient metal melting via electric heating. With exceptional heat resistance and thermal conductivity, it ensures durability under intense temperatures. Widely used in metal casting and metallurgy, these crucibles offer a reliable and precise solution for electric melting processes, allowing repeated use for consistent and controlled metal melting.

## Features

- ▶ High-quality graphite construction
- ▶ Designed for electric melting applications
- ▶ Exceptional heat resistance
- ▶ Efficient thermal conductivity
- ▶ Reliable and precise metal melting solution.
